What is Montessori?

The Montessori method of teaching aims for the fullest possible development of the whole child, ultimately preparing him or her for life's many rich experiences. Dr. Maria Montessori's method of education is based on self-directed activity, hands-on learning and collaborative group work. In Montessori classrooms, children make creative choices in their learning, while the classroom teacher offers age-appropriate activities to guide the process.

Differentiation at its Best!

The Montessori teacher recognizes and takes advantage of children's highly perceptive stages of development through the introduction of specialized materials and activities which are specially designed to stimulate the intellect. The Montessori approach is truly differentiation at its best!

Huntley Hills Montessori teachers are trained facilitators in the classroom, always ready to assist and guide the children. Their purpose is to stimulate the child's enthusiasm for learning and to support its growth. Each child works independently, individually and learns to truly understand concepts according to their own unique needs and capabilities.

"The goal of early childhood education should be to activate the child's own natural desire to learn."
